

## DELIVERING BETTER EXPERIENCES THROUGH COLLABORATION!

With virtual and hybrid events growing in popularity, why not take your meeting to the next level with the Meeting Owl to ensure that everyone in the room is not only heard, but seen as well.

AVMS has partnered with OWL Labs to create better meeting experiences. The Meeting Owl smart video conferencing camera captures 360° video and audio for a near face-to-face experience, no matter your location. The Owl creates a fully immersive experience by automatically shifting the camera to focus on whoever is speaking. The result is an experience that practically feels like sitting in the room with your team, family or friends.

From concept to applause, AVMS will collaborate, communicate and captivate. Please contact AVMS at [info@avms.com](mailto:info@avms.com) or (877) 507-AVMS, should you wish to take your next virtual or hybrid event to the next level with the Meeting Owl.
